

ThevoChair - The Mobility Chair

Alert and attentive...

Ability to concentrate increases, the longer the person rocks. Improved blood circulation, in combination with movement, support the sense of balance and reduce the risk of falling. Patients are more alert and have an improved day/night rhythm.

Less medication – less side effects

With increased rocking duration, antidepressant dosage may be decreased. Rocking for just 80 minutes a day may considerably reduce depression and anxiety.

*Efficacy verified by summary**

ThevoChair - The Mobility Chair

Balances the mind and body
of people with dementia

ThevoChair - The Dementia Chair

Rocking stimulates the senses and activates people!

Scientific studies prove: rocking motions reduce symptoms of dementia.

The person is more even-tempered and receptive, with reduced anxiety and depression.

Smooth rocking motions move the foot, knee and hip joints in a gentle way.

Benefits

- ✓ *Many persons with dementia have a calmer temper and are more receptive*
- ✓ *Reduced care burden for families and caregivers*
- ✓ *No side effects – possibility to reduce medications*
- ✓ *Unique construction provides stability and prevents tipping*
- ✓ *Quality product by Thomashilfen*

Back with MiS Micro-Stimulation®

improves body perception of the person with dementia. This intensifies the positive aspect of the rocking motion

Locking Mechanism for Rocking Motion (Accessory)

for a secure feeling while sitting down and standing up

Rotary Plate (optional cover available)

swivels 360 degrees to offer a wide range of seating positions as well as a safe sitting down and standing up process

Safety

Constructed for optimal stability while rocking. The rocking runners move gently, while the chair remains stable. Revolving platform rotates by 360° offering a range of views and activities and the ease of sitting down and getting up without risk.

Gentle rocking

requires little effort thanks to special pendulums to gently move body joints

Foot stool (option)

works in harmony with the ThevoChair and provides additional movement impulses

Reference

Please use the incontinence covers for ThevoChair and it's footstool for extended use especially, e.g. in care communities. Due to elastic material it is very easy to install the protective covers.

Fabric

The breathable fabric can be wiped clean and disinfected. It is moisture-resistant and fire-retardant
